Description

National Center of relevance, Lumignano is appreciated for the elegance of the type of climbing it offers and for the extreme quality of the rock. This cliff, now historic, has attracted climbers since the dawn of this sport; in the "Classic" sector, many of today's strongest climbers were seen to pass. It seems that as early as 1924, by di Severino Casara, the dihedral-fissure of the "Sbrega" rose. Then in the 70s Renato Casarotto and Heinz Mariacher followed.

Access

Take the A4 motorway and exit at Vicenza Est. Follow the directions for Este, Longare and SS247. You reach an intersection and above a bridge, turn left on a large road: the Berica Riviera. Turn right and turn right after about 3 km, following the signs for Lumignano. Overcoming Costozza and after a series of curves you reach your destination
